

Jason C. Dixon

Senior Solutions Engineer · Operations & Quality Leader · Modular & Prefab Manufacturing

North Carolina | +1 (910) 817-5022 | jason.c.dixon@gmail.com | jasoncdixon.com | linkedin.com/in/jasoncdixon

PROFESSIONAL SUMMARY

Operations and quality leader turned solutions engineer. I help modular and prefab manufacturers improve quality, throughput, and accountability, and I help the software companies serving them build products that hold up on the factory floor. Twenty-plus years leading teams, with implementation timelines cut by more than half, rework reduced 30%, and user adoption up 25% across enterprise accounts.

PROFESSIONAL EXPERIENCE

Senior Solutions Engineer

Sep 2022 – Present

Offsight · Full-time · Remote, United States

- Cut average implementation time by more than 50% by owning client onboarding end to end, from requirements gathering and configuration through training and post-launch support.
- Raised user adoption 25% across enterprise accounts by turning what the floor actually needed into product requirements the development team could build.
- Run the full post-sale function for 20+ manufacturers across North America, covering onboarding, implementation, training, and account management.
- Cut manual reporting for client teams by designing workflow configurations and integrations that connect engineering, production, quality, and purchasing in one system.
- Get operators competent inside the first month through on-site and virtual workshops measured against competency benchmarks, not attendance.
- Advise owners and executives on where the bottleneck actually is, using their own production data, and recommend the process changes that pay for themselves first.
- Increase close rates on target accounts by running the technical discovery and demonstrations that decide whether a deal is winnable.

Quality Control Manager

Aug 2019 – Sep 2022

Volumetric Building Companies · Full-time · North Carolina

- Reduced rework 30% by building quality assurance systems end to end against building codes, engineering specifications, and customer requirements.
- Cut project completion timelines 15% by streamlining inspections across engineering, production, and third-party inspectors.
- Raised post-delivery satisfaction 20% with a customer service follow-up process that closed issues before they reached the builder.
- Caught defects earlier by establishing layered process audits and corrective action protocols across production and service.
- Made quality performance visible in real time by creating digital process tracking and reporting tools the departments actually shared.
- Built and led cross-functional quality and service teams, and raised throughput without loosening quality standards.

Service Manager

Jan 2018 – Sep 2019

Ritz-Craft Custom Homes to Volumetric Building Companies · Full-time · North Carolina

- Owned post-delivery service resolution across builder and homeowner accounts, directing work between production, field crews, and customers.

District Manager

Oct 2016 – Jan 2018

CZ Wireless, Inc. · United States

- Grew sales more than 15% year over year on every key indicator and profit more than 25% year over year, while running staffing, inventory, purchasing, vendors, and marketing.
- Launched a new business-to-business IT solutions venture as Business Solutions Consultant.

Regional Account Manager

Mar 2015 – Sep 2016

Ritz-Craft Custom Homes · North Carolina

- Grew total sales 38% year over year and signed the largest account in the Southeast coastal territory, turning a low-producing territory into a multi-million dollar one.
- Prospected new builders, processed estimates, negotiated accounts, and helped clients market to their own customers.

Store Manager

Dec 2011 – Feb 2015

AT&T · Alltel Wireless · North Carolina

- Kept a four-county market running through a billing system migration of more than 600,000 customers, leading training, troubleshooting, issue reporting, and escalations across multiple locations.
- Built the sales training and tracking used across the market, and set goals at both market and individual level.

Sales Representative to Assistant Store Manager

Sep 2001 – Dec 2011

Alltel Wireless · North Carolina

- Ran the retail location and coached sales representatives, building the training and tracking programs that lifted individual performance.
